safety

Diamond Cut Concrete continually invest in the latest machinery and diamond tool technology. Masonry sawing and drilling has evolved at a rapid rate over the past 25 years. As construction methods have developed, so has the need to repair, renovate, modify and correct heavy reinforced concrete.

 Diamond Cut Concrete work closely with suppliers to ensure we offer advanced methods to safely complete the most challenging of jobs.

- ◆ Our staff are fully trained in all facets of Occupational Health and Safety in accordance with the CCIA Training System.
- ◆ Planning and preparation with every job is of primary importance to ensure the safety of all staff and other trades.

- ◆ We evaluate and provide the right tool for the job! All equipment is serviced and maintained to manufacturers specifications.

We do the job right, first time!
